\*Vs manual feed rotary tube cleaner

AUTO FEED  
TUBE CLEANER

## RAM-5DC Revolutionary Speed

The fastest rotary tube cleaner just got faster! Experience the game changing speed and control of our newest innovation, the Reverse Stop Assembly Speed-Feed gun exclusively for the RAM-5DC. The Reverse Stop Assembly combined with our Speed-Feed technology delivers all the speed and precision now with the ability to automatically detect when the brush is retracted from the tube and stop it in the optimal position. You can now go from tube to tube even faster than before.

With the Reverse Stop Assembly Speed-Feed Gun, you just pull the trigger and let the gun do all the work. As the cleaning tool loosens debris, the shaft casing provides a steady stream of water, flushing out debris and restoring system efficiency. With the Reverse Stop Assembly Speed-Feed Gun and variable speed function, you control the direction of shaft rotation, water flow, brush rpm and feed rate.
